Henderson Amateur Radio Club, Inc.

Sunday Night Net Specifications

This directory contains information about the HARC Sunday Night Net (SNN) and how it is currently configured.

Should someone else take over the net administration, this process may differ substantially.

The DDL (Data Definition Language) directory contains the SQL definitions of the database including Tables and Views.

HARC_SNN_Specification (both .docx and .pdf) contain the descriptions of the overall business system.

Also contained in the HARC_SNN_PUBLIC Directory are the following:

File	Description
HARC_Callout_Roster_20240331	The callout roster used on the March 31 , 2024 net
HARC_Checkins_20240331	The list of stations who checked into the March 31, 2024 net.
HARC_Net_Script_2024034	The script that was used during the March 31, 2024 net.
HARC_SNN_3_PROD.sql	A copy of the production database used by the system. Data is current through April 1, 2024.

README

HARC_SNN_Call_Roster.xlsx	A MS Excel spreadsheet used to print the roster out in a clean format. Also contains listing of all callsigns by suffix to assist in the call for missed stations, along with a line chart showing the number of check-ins for each net.
HARC_SNN_Sched.xls	Spreadsheet used to set the quarterly net controller schedule.
HARC_SNN_Specificatop	An MS Word and PDF version of the system specification describing the underlying business and physical system.
Silent_Key_Ceremony	For those unfortunate times when a club member becomes a silent key. Contains baseline text that can be used in a simple (but rather moving) silent key ceremony.
SQLiteStudio.webarchive	A link to the free database management software SQLiteStudio which can be used to connect to and manage HARC_SNN_3_PROD.sql database.
TUESDAY_MORNING_TEXT.txt	A text description of the Tuesday Morning Meeting QST that can be inserted into the script document (HARC_Net_Script_2024034)

The new net control administrator, along with the current Board of Directors, may have other plans for the Sunday Night Net.
